<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Select your location

The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live.

This is a shortlist of locations based on the language you selected. Choose "other" if your location is not listed.

Country, territory or area:

Antigua and Barbuda  
Australia  
Botswana  
Canada  
Hong Kong  
India  
Ireland  
New Zealand  
Nigeria  
Philippines  
Singapore  
South Africa  
United Kingdom  
**United States**  
Zambia  
Zimbabwe  
other

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Configure the keyboard

You can try to have your keyboard layout detected by pressing a series of keys. If you do not want to do this, you will be able to select your keyboard layout from a list.

Detect keyboard layout?

<Go Back>

<Yes>

**<No>**

<Tab> moves; <Space> selects; <Enter> activates buttons

## [!] Configure the keyboard

The layout of keyboards varies per country, with some countries having multiple common layouts. Please select the country of origin for the keyboard of this computer.

Country of origin for the keyboard:

Armenian  
Azerbaijani  
Bambara  
Bangla  
Belarusian  
Belgian  
Bosnian  
Braille  
Bulgarian  
Burmese  
Chinese  
Croatian  
Czech  
Danish  
Dhivehi  
Dutch  
Dzongkha  
English (Cameroon)  
English (Ghana)  
English (Nigeria)  
English (South Africa)  
English (UK)  
**English (US)**

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

## [!] Configure the keyboard

Please select the layout matching the keyboard for this machine.

Keyboard layout:

**English (US)**  
English (US) - Cherokee  
English (US) - English (Colemak)  
English (US) - English (Dvorak alternative international no dead keys)  
English (US) - English (Dvorak)  
English (US) - English (Dvorak, international with dead keys)  
English (US) - English (Macintosh)  
English (US) - English (US, alternative international)  
English (US) - English (US, international with dead keys)  
English (US) - English (US, with euro on 5)  
English (US) - English (Workman)  
English (US) - English (Workman, international with dead keys)  
English (US) - English (classic Dvorak)  
English (US) - English (international AltGr dead keys)  
English (US) - English (left handed Dvorak)  
English (US) - English (programmer Dvorak)  
English (US) - English (right handed Dvorak)  
English (US) - English (the divide/multiply keys toggle the layout)  
English (US) - Russian (US, phonetic)  
English (US) - Serbo-Croatian (US)

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Configure the network

Please enter the hostname for this system.

The hostname is a single word that identifies your system to the network. If you don't know what your hostname should be, consult your network administrator. If you are setting up your own home network, you can make something up here.

Hostname:

ubuntu

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Set up users and passwords

A user account will be created for you to use instead of the root account for non-administrative activities.

Please enter the real name of this user. This information will be used for instance as default origin for emails sent by this user as well as any program which displays or uses the user's real name. Your full name is a reasonable choice.

Full name for the new user:

testuser

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!!] Set up users and passwords

Select a username for the new account. Your first name is a reasonable choice. The username should start with a lower-case letter, which can be followed by any combination of numbers and more lower-case letters.

Username for your account:

testuser

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!!] Set up users and passwords

A good password will contain a mixture of letters, numbers and punctuation and should be changed at regular intervals.

Choose a password for the new user:

\*\*\*\*\*

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!] Set up users and passwords

Please enter the same user password again to verify you have typed it correctly.

Re-enter password to verify:

\*\*\*\*\*

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!] Set up users and passwords

You may configure your home directory for encryption, such that any files stored there remain private even if your computer is stolen.

The system will seamlessly mount your encrypted home directory each time you login and automatically unmount when you log out of all active sessions.

Encrypt your home directory?

<Go Back>

<Yes>

<No>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Configure the clock

Based on your present physical location, your time zone is Asia/Tokyo.

If this is not correct, you may select from a full list of time zones instead.

Is this time zone correct?

<Go Back>

<Yes>

<No>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!!] Partition disks

The installer can guide you through partitioning a disk (using different standard schemes) or, if you prefer, you can do it manually. With guided partitioning you will still have a chance later to review and customise the results.

If you choose guided partitioning for an entire disk, you will next be asked which disk should be used.

Partitioning method:

Guided - use entire disk

Guided - use entire disk and set up LVM

Guided - use entire disk and set up encrypted LVM

Manual

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

### !!! Partition disks

Note that all data on the disk you select will be erased, but not before you have confirmed that you really want to make the changes.

Select disk to partition:

SCSI3 (0,0,0) (sda) - 8.6 GB ATA VBOX HARDDISK

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

### !!! Partition disks

Before the Logical Volume Manager can be configured, the current partitioning scheme has to be written to disk. These changes cannot be undone.

After the Logical Volume Manager is configured, no additional changes to the partitioning scheme of disks containing physical volumes are allowed during the installation. Please decide if you are satisfied with the current partitioning scheme before continuing.

The partition tables of the following devices are changed:

SCSI3 (0,0,0) (sda)

Write the changes to disks and configure LVM?

<Yes>

<No>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Partition disks

You may use the whole volume group for guided partitioning, or part of it. If you use only part of it, or if you add more disks later, then you will be able to grow logical volumes later using the LVM tools, so using a smaller part of the volume group at installation time may offer more flexibility.

The minimum size of the selected partitioning recipe is 3.0 GB (or 36%); please note that the packages you choose to install may require more space than this. The maximum available size is 8.3 GB.

Hint: "max" can be used as a shortcut to specify the maximum size, or enter a percentage (e.g. "20%") to use that percentage of the maximum size.

Amount of volume group to use for guided partitioning:

8.3 GB

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!!] Partition disks

If you continue, the changes listed below will be written to the disks. Otherwise, you will be able to make further changes manually.

The partition tables of the following devices are changed:

- LVM VG ubuntu-vg, LV root
- LVM VG ubuntu-vg, LV swap\_1
- SCSI3 (0,0,0) (sda)

The following partitions are going to be formatted:

- LVM VG ubuntu-vg, LV root as ext4
- LVM VG ubuntu-vg, LV swap\_1 as swap
- partition #1 of SCSI3 (0,0,0) (sda) as ext2

Write the changes to disks?

<Yes>

<No>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Configure the package manager

If you need to use a HTTP proxy to access the outside world, enter the proxy information here. Otherwise, leave this blank.

The proxy information should be given in the standard form of "http://[[user][:pass]@]host[:port]/".

HTTP proxy information (blank for none):

\_\_\_\_\_

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Configuring taskel

Applying updates on a frequent basis is an important part of keeping your system secure.

By default, updates need to be applied manually using package management tools. Alternatively, you can choose to have this system automatically download and install security updates, or you can choose to manage this system over the web as part of a group of systems using Canonical's Landscape service.

How do you want to manage upgrades on this system?

**No automatic updates**

Install security updates automatically

Manage system with Landscape

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Software selection

At the moment, only the core of the system is installed. To tune the system to your needs, you can choose to install one or more of the following predefined collections of software.

Choose software to install:

- ☒ OpenSSH server
- ☐ DNS server
- ☐ LAMP server
- ☐ Mail server
- ☐ PostgreSQL database
- ☐ Print server
- ☒ Samba file server
- ☐ Tomcat Java server
- ☐ Virtual Machine host
- ☐ Manual package selection

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons

### [!] Install the GRUB boot loader on a hard disk

It seems that this new installation is the only operating system on this computer. If so, it should be safe to install the GRUB boot loader to the master boot record of your first hard drive.

Warning: If the installer failed to detect another operating system that is present on your computer, modifying the master boot record will make that operating system temporarily unbootable, though GRUB can be manually configured later to boot it.

Install the GRUB boot loader to the master boot record?

<Go Back>

<Yes>

<No>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!!] Finish the installation

#### Installation complete

Installation is complete, so it is time to boot into your new system. Make sure to remove the installation media (CD-ROM, floppies), so that you boot into the new system rather than restarting the installation.

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons
